

Google Rich Snippets Breadcrumbs

Module for PrestaShop v.1.4 o higher

This module for PrestaShop add the necessary code in your store to display the path breadcrumbs or navigation Ariadne's thread of the categories and products from its store in a Google search.

Demo:

[Click here](#) and see in search results, entries ModuleShop products, check the thread of Ariadne breadcrumbs or navigation (green links between the post title and product description).

Test:

To verify that the module will work properly can access the web from Google: <http://www.google.com/webmasters/tools/richsnippets>

You must enter the url Corresponding page of a product and see the result in searches will be expected.

Example: [Rich Snippets test for a product in store test](#)

Installation and configuration:

You only need to install the module from your computer via the tab 'modules' and wait until Google updates the index page of your store (2-3 days) to see the changes.

Recommendations:

If you have modified the heart of your PrestaShop regarding the burden of Breadcrumbs Store the module may not function properly.

Please review before your shop already has a thread of ariadne breadcrumbs or navigation working properly.
