

Installation guide Background banner

"Background banner"

Prestashop module developed by OBSolutions

Module for PrestaShop v.1.5 o better

This Prestashop's module will let you add two promotional images or banners as static background of your shop, with a link (optional).

Module installation

To install the module, you must go to the 'Modules' tab of your Back-Office of Prestashop and select 'Add new module'. A new section will open where you must select the ZIP file that you have download when buying this product and once selected you must click 'Upload this module'.

Module configuration

Background Banner 2.1.0

Fields description:

- Left banner active: It will let you enable or disable the left banner.
- **Right banner active:** It will let you enable or disable the right banner.
- Width of your shop's template: It will let you setup the separation, in pixels, between left and right banners. It will be determined by the maximum width of your template.
- **Center vertically:** It will let you setup whether you want or not positionate the banners aligned vertically to the mid of the page.
- **Distance from top of the page:** It will let you setup the distance that will apper the banner from the top of the page.
- Left banner image: It will let you select the left background image.
- **Left banner link:** URL of the site you want to redirect the customer after clicking the left banner.
- **Right banner image:** It will let you select the right background image.
- Right banner link: URL of the site you want to redirect the customer after clicking the right banner.

Recomendations

Please note that using images larger than wider will fit better. If you use images with transparent background you will get better results too.
