# Google Rich Snippets Products

Module for PrestaShop v.1.3 o higher

This module for PrestaShop adds the necessary code in your store to display all important information of your products as name, description, price, stock, etc in a Google search.

**Test:**

To verify that the module will work properly can access the web from Google: http://www.google.com/webmasters/tools/richsnippets

You must enter the url Corresponding page of a product and see the result in searches will be expected.

Example: Rich Snippets test for a product in store test

**Installation and configuration:**

You only need to install the module from your computer via the tab 'modules' and wait until Google updates the index page of your store (2-3 days) to see the changes.

 **Recommendations:**

If  you have modified PrestaShop core in relation to the loading data of the products in the store, module may not work properly.
