## Module Installation

The screenshot shows the PrestaShop back office interface. At the top, there is a navigation bar with tabs: Catálogo, Clientes, Pedidos, Pago, Transporte, Estadísticas, Módulos (highlighted), Empleados, Preferencias, and Herramientas. Below this is a sub-navigation bar with links: Modules & Themes Catalog, My Account, Temas, and Posiciones. The main content area is titled 'Back Office > Módulos'. It contains two options: 'Añadir un módulo a partir de mi ordenador' (selected) and 'Añadir un módulo a partir de PrestaShop Addons'. A search bar with a 'Buscar' button is located to the right. Below the options is a section titled 'Añadir nuevo módulo' with the instruction 'El módulo debe ser un archivo zip o un archivo tar.' There are two input fields: 'URL del módulo' with a 'http://' prefix and a 'Descargar este módulo' button, and 'Archivo del módulo' with an 'Examinar...' button and a 'Subir este módulo' button. A red box highlights the 'Archivo del módulo' section, and a red arrow points to the 'Examinar...' button.

To install the module, you should go to 'modules' tab of the Prestashop's back office and select 'Add a module from my computer'. It'll open a window where you'll be able to select the downloaded ZIP file. Then, click on the button 'Upload this module'.

## **Module configuration**

Not required.

## **Styles**

You can edit the styles of the module by modifying the file included in the module folder `styles /CSS`.
